(54) Title: **INHALER**

(57) Abstract: Device for use with an inhaler, the inhaler comprising a body, an aerosol canister arranged in said body containing medicament, comprising a metered dose chamber and able to dispense a metered dose of said medicament, a nozzle in fluid communication with said canister, an opening for dispensing of said medicament in fluid communication with said nozzle, said device comprising means (34, 36, 42, 44, 46, 50, 52) for activating said canister to open and dispense said medicament in response to an airflow in the inhaler caused by inhalation of a user through said opening, return means (42, 46, 56, 58, 60) for deactivating said canister to close it, characterised in that said return means deactivates said canister when the airflow drops below a certain threshold value.
